El ction/R strictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - II. Claims 26-31, drawn to a magazine, classified in classes 42 and 89, subclass there are many.
 - III. Claims 31-41, drawn to a positive round control system for a grenade launcher, classified in class 89, subclass 33.1.
2. Inventions II and III are related as **subcombinations disclosed as usable together** in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has a separate utility such as being used with a manual firearm such as a shotgun. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, their recognized divergent subject matter, and divergent search requirement, restriction for examination purposes as indicated is proper.
